Vi Agroforestry

- New strategy 2013-2015

Vision

A sustainable environment that enables people in poverty to improve their lives.

Mission

Through agroforestry and support to farmer organisations, help to reduce poverty, secure the right to food, increase incomes, increase biodiversity and adapt agriculture to climate.

Farmers' Organisations Agroforestry Programme (FOA)

- Objective:
“Empowered farmer organisations addressing the rights of their members and effectively contributing to sustainable land use management in the Lake Victoria Basin”
- Supporting country consortia of 20 farmers' organisations around Lake Victoria

Kenya Agriculture Carbon Project

- The method of "Sustainable Agriculture Land use Management" approved by the Verified Carbon Standard
- The first project in Africa for the land and agriculture.
- Aims to maintain and restore degraded agricultural land into functioning ecosystems from a landscape perspective. It is essential to increase farmers' resilience to climate change, the production of ecosystem services and food security.
- 60 000 farmers on 45 000 ha in Western Kenya
