

Madelene Ostwald

Focali – Forest climate and livelihood research network

Centre for climate science and policy research Linköping University
Center for Environment and Sustainability GMV GU/Chalmers
placed at Physical Resource Theory, Chalmers

Swedish researchers: Martin Karlson, Anders Malmer, Per Knutsson, Jenny Friman, Lisa Westholm, Eskil Mattsson, Gert Nyberg, Göran Berndes, Maria Fransén, Lisa Axelsson, Lina Hammarstrand, Andreas Särnberger, Martin Person and Jesper Moberg

Research in Africa

- Carbon estimation of parklands using remote sensing and field inventories (Burkina Faso)
- Livelihood aspects of parklands using household surveys (Burkina Faso)
- REDD+ interventions and local governance – from global to local (Burkina Faso and Tanzania)
- Scrutinising the story of success of green enclosures from the 80s until today (Kenya)
- Scenarios for rehabilitate degraded miombo forest with focus on carbon (biomass and soil) (Tanzania)

Other restoration projects

- India

Jatropha farmers' experiences of a wasteland-targeted bioenergy program

- China

carbon mitigation estimation of the large scale Slope Land Conversion Programme

- Sri Lanka

assessment of impacts (barriers and benefits) of potentially expanding 'homegardens' into degraded slash-and-burn areas
